

### Why should I care?

#### Because Common Core...

was never voted on by elected officials in our state legislature- no local control!

is an invasion of student and family privacy.

results in psychological manipulation and testing of our children.

prepares our children for only a 2-yr Community College not a 4-yr University.

provides inadequate math skills and offers a greatly reduced study of literature.

endangers private and home school education.

expands government preschool and home visiting programs.

implementation will be a huge cost to taxpayers!
